

## **Addendum 4**

The following is a letter from Christian Balslev-Olesen who is currently serving as the representative of UNICEF in Eritrea. Although he cannot attend the meetings for the moment he has made the following contribution to the report of the May meeting. It consists in a letter conveying an excellent report on poverty. The introductory material is given below with Christian's letter. The introductory material contains a hyper link to the web cite of the source of the report.

Dear Barbara,

Thanks for your Triglav Note on Seeking an Ethical Framework for Poverty Reduction.

I have read the Note with great interest and would just like to say I would very much have liked to be with you during the meeting 2 – 3 May.

But it seems difficult for me to attend your meeting now I am in Africa!

I like your Note and the contributions from different people attending the meeting.

I only have one observation: I would have liked to present and reflect some of the Christian contributions to the whole issue – I have special in mind the study you yourself took part in and made substantial input to: Christianity, Poverty and Wealth.

For your reference I have enclosed the text, which was published last year. Hope you can find some inspiration from that text.

Looking forward to hear from you. Unfortunately I have no planed visit to New York for the time being. But would let you know next time I am in US.

Best regards to both of you

Christian
